TECHNICAL SKILLS

Languages:	Java (Primary), JavaScript, C++, SQL
Backend and Distributed Systems:	Spring Boot, Microservices, RabbitMQ, Eureka, Keycloak, REST APIs
Databases:	MySQL, MongoDB, PostgreSQL, MongoDB Atlas
Frontend:	React, React Native
Tools and Platforms:	Git, Docker, Postman, Linux

EXPERIENCE

FlashVerse | Full Stack Developer Intern

Remote

Jan 2026 – Present

- Designed modular **React Native** components and **Node.js** REST APIs for onboarding and notification workflows in a production application.
- Implemented secure **JWT/session-based authentication** with role-based access control to protect application routes and user data.

PROJECTS

Car Rental System – [Repo Link](#)

Technologies: Spring Boot, React, RabbitMQ, Redis, Docker, MongoDB, Netflix Eureka, Spring Cloud Gateway

- Built a **microservices-based car rental platform** using **Spring Boot**, **Spring Cloud Gateway**, and **Netflix Eureka**; achieved **0% failure rate** across **1,567 requests** under 50 concurrent users.
- Engineered **distributed vehicle locking** with **Redis** to prevent double bookings and implemented **caching** reducing search response time to **16ms**; designed async payment pipeline via **RabbitMQ** with Dead Letter Queues.
- Implemented **JWT authentication** with **refresh token rotation**, centralized validation at the **API Gateway**, and token refresh via **Axios interceptor** across all services.
- Containerized full stack using **Docker Compose**; wrote **35+ unit tests** with **JUnit 5** and **Mockito** covering Redis rollback, RabbitMQ event publishing, and booking lifecycle; achieved **~50 req/sec** throughput.

City Relocator App – [Repo Link](#)

Technologies: Spring Boot, WebFlux, WebClient, MongoDB Atlas, Docker, RapidAPI, Redis, Google Places API

- Built a city relocation assistant using **Spring Boot** and **React Native (Expo)**; integrated **Google Places API** via **Spring WebFlux** with **Flux.merge** for concurrent multi-category place fetching, reducing API wait time.
- Implemented **Redis geo-spatial caching** using **GEORADIUS** queries with a **5km radius** to serve cached place results, eliminating redundant **Google Places API** calls and persisting results to **MongoDB Atlas** for future requests.
- Deployed **Dockerized** backend on **Render** with environment-based config profiles; distributed **Android APK** via **EAS Build** on **Expo**, making the app publicly downloadable end-to-end.

EDUCATION

ABES Engineering College

B.Tech in Computer Science and Engineering

CGPA: **7.8** (till 6th semester)

Nov 2023 – Present

Ghaziabad, UP

Lucknow Public College

Class XII (ISC, PCM)

May 2022

93.2%

ACHIEVEMENTS

- Ranked **2,200 out of 43,027** in LeetCode Weekly Contest 490, solving 4 out of 4 problems.
- Global rank **860** in CodeChef Starters 207 (Div. 3).
- LeetCode**: Rated **1800+**, solved **300+** problems.
- CodeChef**: Rated **1500+**, solved **200+** problems.
- Top **10** finish in **2 hackathons** (out of 121 teams); participated in **3+** hackathons/workshops.
